PAKISTAN APOSTILLE: DESTINATION CHECKLIST

One-page guide | Check before paying for an apostille or translation

LISAN.PK | Last fact-check: 5 November 2026

STEP 1 | Check whether the Convention applies

YES, subject to the recipient's rules: Saudi Arabia, UK, US, Canada, Italy, Spain, France, Switzerland, Turkey, Oman, Bahrain, Australia and others.
Always verify treaty entry-into-force and Pakistan-specific objections.

STEP 2 | Eight countries that objected to Pakistan

Germany | Austria | Netherlands | Czechia | Denmark
Finland | Greece | Poland
A Pakistan apostille does NOT take effect under the Convention for them.
Germany may require document verification, not routine embassy legalisation.
Pakistan also declared: Convention does not apply to India / unrecognised entities.

STEP 3 | Non-party destinations need a different route

UAE | Qatar | Kuwait | Malaysia
Check Pakistan MOFA general attestation and the destination mission's current rules. Do not assume the same embassy chain applies everywhere.

STEP 4 | Before submitting any document

[ ] Identify the original issuing country and intended destination.
[ ] Verify the receiving university, visa authority, employer or registrar rules.
[ ] Check if the document needs apostille, legalisation or other verification.
[ ] Check source-language and target-language translation requirements.
[ ] Confirm issuer/HEC/IBCC or other preliminary authentication if applicable.
[ ] Use the correct government process; retain receipts and reference numbers.
[ ] Verify the completed certificate through the authorised portal if provided.

CAUTION: Apostille does not itself translate or validate the content.
